

Annals of Vascular Surgery 1990

A

Abdominal aorta

Seat belt aorta. Randhawa and Menzoian. (USA) 1990; 4:370-377

Supraceliac clamping: An underused alternative in aortic surgery. Joyce and Ward. (United Kingdom) 1990; 4:393-396

Abdominal aortic aneurysm

A chronic contained rupture of an abdominal aortic aneurysm complicated with severe back pain. Nakagawa et al. (Japan) 1990; 4:189-192

The calcium messenger system and the kinetics of elastase release from human neutrophils in patients with abdominal aortic aneurysms. Cohen et al. (USA) 1990; 4:570-574

Aortocaval fistula and contained rupture of an abdominal aortic aneurysm presenting with pelvic venous congestion. Saxon et al. (USA) 1990; 4:381-383

Clinical experience with a collagen-impregnated knitted Dacron vascular graft. Freischlag and Moore. (USA) 1990; 4:449-454

Combined mortality and morbidity of direct surgical treatment of abdominal aortic aneurysm. Branchereau et al. (France) 1990; 4:10-14

Iliocaval venous compression due to aneurysm of the abdominal aorta: Report of ten cases. Combe et al. (France) 1990; 4:20-25

Late results of preferential use of tube versus bifurcation grafts for abdominal aortic aneurysmectomy. Friedman et al. (USA) 1990; 4:39-41

Long-term survival in patients undergoing resection of abdominal aortic aneurysm. Vohra et al. (Scotland) 1990; 4:460-465

Renal failure after operation for abdominal aortic aneurysm. Olsen et al. (Denmark) 1990; 4:580-583

Selective use of arteriography in the assessment of aortic aneurysm repair. Campbell et al. (USA) 1990; 4:419-423

Traumatic dissection in an inflammatory aneurysm. Stella et al. (Italy) 1990; 4:384-387

Amaurosis fugax

The natural history of amaurosis fugax with minor degrees of internal carotid artery stenosis. Torem et al. (USA) 1990; 4:46-51

Amputation

Amputation in elderly and high-risk vascular patients. Greant and VandenBrande. (Belgium) 1990; 4:288-290

Impact of the presence of orthopedic hardware on technical performance of major amputations. Kaufman et al. (USA) 1990; 4:356-358, 1990; 4:356-358

Primary closure of below-knee amputation stumps: A prospective study of sixty-two cases. Aligne et al. (France) 1990; 4:143-146

Anastomosis, aortoprosthetic

End-to-side aortoprosthetic anastomoses: Long-term computed tomography assessment. Mikati et al. (France) 1990; 4:584-591

Aneurysm. see also Abdominal aortic aneurysm

Antibiotic therapy for arterial infection: Lessons from the successful treatment of a mycotic femoral artery aneurysm without surgical reconstruction. Kaufman et al. (USA) 1990; 4:592-596

Basic data related to peripheral artery aneurysms. McCann. (USA) 1990; 4:411-414

Clinical experience with a collagen-impregnated knitted Dacron vascular graft. Freischlag and Moore. (USA) 1990; 4:449-454

Isolated iliac artery aneurysms. Weimann et al. (Austria) 1990; 4:297-301

Multiple aneurysms in a seven-year-old child. Bordeaux et al. (France) 1990; 4:26-28

Pancreaticoduodenal artery aneurysms associated with celiac axis stenosis: Report of two cases and review of the literature. Quandalle et al. (France) 1990; 4:540-545

Rupture of a superior mesenteric artery aneurysm in a child. Detroux et al. (Belgium) 1990; 4:506-509

Spontaneous aneurysm of the extracranial vertebral artery associated with spinal osseous anomaly. Habozit and Battistelli. (France) 1990; 4:600-603

Traumatic dissection in an inflammatory aneurysm. Stella et al. (Italy) 1990; 4:384-387

Type IV Ehlers-Danlos syndrome with isolated arterial involvement. Bellonot et al. (France) 1990; 4:15-19

Angina, intestinal

Recent trends in the diagnosis and management of chronic intestinal ischemia. Hallett et al. (USA) 1990; 4:126-132

Angiography, occlusive. see also arteriography

Endovascular occlusive intervention in the management of trauma. Klein et al. (USA) 1990; 4:424-430

Angioplasty

The suitability of expanded PTFE for carotid patch angioplasty. LeGrand and Linehan. (USA) 1990; 4:209-212

Closure of the internal carotid artery after endarterectomy: The advantages of patch angioplasty without its disadvantages. Vanmaele et al. (Belgium) 1990; 4:81-84

Proximal percutaneous balloon angioplasty and distal bypass for multilevel arterial occlusion. Wilson et al. (USA) 1990; 4:351-355

- Results of percutaneous transluminal angioplasty for peripheral vascular occlusive disease.** Wilson and Sheppard. (USA) 1990; 4:94-97
- Successful percutaneous angioplasty after failed femorodistal bypass.** Harris et al. (USA) 1990; 4:431-436
- Transluminal angioplasty performed by the surgeon in lower limb arterial occlusive disease: One hundred fifty cases.** Clément et al. (France) 1990; 4:519-527
- Antibiotic therapy**
- Antibiotic prophylaxis of late bacteremic vascular graft infection in a dog model.** Goëau-Brissonnière et al. (France) 1990; 4:528-532
 - Antibiotic therapy for arterial infection: Lessons from the successful treatment of a mycotic femoral artery aneurysm without surgical reconstruction.** Kaufman et al. (USA) 1990; 4:592-596
- Aortic dissection**
- Doppler ultrasound in aortic dissections: A study of cephalic and peripheral arteries.** Dany et al. (France) 1990; 4:442-448
 - Traumatic dissection in an inflammatory aneurysm.** Stella et al. (Italy) 1990; 4:384-387
- Aortic implantation**
- Aortic reimplantation of the superior mesenteric artery for atherosclerotic lesions of the visceral arteries: Sixty cases.** Kieny et al. (France) 1990; 4:122-125
 - Implantation of the distal aorta: A technique for preservation of pelvic blood flow in aortofemoral reconstruction.** Goldstein et al. (USA) 1990; 4:213-217
- Aortic isthmus**
- Calcified obstructive disease of the aortic isthmus.** Coffin et al. (France) 1990; 4:147-150
- Aortobifemoral bypass**
- End-to-side aortoprosthetic anastomoses: Long-term computed tomography assessment.** Mikati et al. (France) 1990; 4:584-591
 - False aneurysm infected by *Aspergillus fumigatus*: An unusual complication of aortofemoral bypass graft.** Nussaume et al. (France) 1990; 4:388-392
- Aortoiliac disease**
- The effect of femoral arteriography on the incidence of groin contamination and postoperative infections.** Ameli et al. (Canada) 1990; 4:328-332
 - False aneurysm infected by *Aspergillus fumigatus*: An unusual complication of aortofemoral bypass graft.** Nussaume et al. (France) 1990; 4:388-392
 - Traumatic dissection in an inflammatory aneurysm.** Stella et al. (Italy) 1990; 4:384-387
- Aplasia**
- Bilateral congenital aplasia of the deep femoral arteries.** Schmidt et al. (W. Germany) 1990; 4:498-501
- Arteriography**
- The effect of femoral arteriography on the incidence of groin contamination and postoperative infections.** Ameli et al. (Canada) 1990; 4:328-332
 - Anatomic and clinical factors associated with complications of transfemoral arteriography.** Lilly et al. (USA) 1990; 4:264-269
 - Can duplex scanning replace arteriography for lower extremity arterial disease?** Kohler et al. (USA) 1990; 4:280-287
 - Carbon dioxide digital subtraction arteriography: A pilot study.** Weaver et al. (USA) 1990; 4:437-441
- Intraoperative transcutaneous oxygen tension criteria for completion arteriography.** Alexander et al. (USA) 1990; 4:333-337
- Neurologic complications of axillary and brachial catheter arteriography in atherosclerotic patients: Predictive factors.** Gagliardi et al. (France) 1990; 4:546-549
- Pelvic arteriovenous fistulas: Therapeutic strategy in five cases.** Laurian et al. (France) 1990; 4:1-9
- Safe extracranial vascular evaluation and surgery without preoperative arteriography.** Hill et al. (USA) 1990; 4:34-38
- Selective use of arteriography in the assessment of aortic aneurysm repair.** Campbell et al. (USA) 1990; 4:419-423
- Superior mesenteric artery embolism: Eighty-two cases.** Batellier and Kieny. (France) 1990; 4:112-116
- Transluminal angioplasty performed by the surgeon in lower limb arterial occlusive disease: One hundred fifty cases.** Clément et al. (France) 1990; 4:519-527
- Arteriography predictability index**
- Selective use of arteriography in the assessment of aortic aneurysm repair.** Campbell et al. (USA) 1990; 4:419-423
- Arterioportal fistula**
- Arterioportal fistulas: Twelve cases.** Pietri et al. (France) 1990; 4:533-539
- Arteriovenous fistula**
- Traumatic superior mesenteric artery—portal vein fistula.** Deitrick et al. (USA) 1990; 4:72-76
- Arteritis**
- Mesenteric infarction in Takayasu's disease.** Nussaume et al. (France) 1990; 4:117-121
 - Takayasu's disease: Diagnostic and therapeutic value of subclavian artery biopsy.** Long et al. (France) 1990; 4:151-155
- Aspergillus fumigatus**
- False aneurysm infected by *Aspergillus fumigatus*: An unusual complication of aortofemoral bypass graft.** Nussaume et al. (France) 1990; 4:388-392
- Asymptomatic patient**
- The risk of carotid endarterectomy for the asymptomatic patient: An argument for prophylactic operation.** Treiman et al. (USA) 1990; 4:29-33
 - Safety and long-term benefit of carotid endarterectomy in the asymptomatic patient.** Park et al. (USA) 1990; 4:218-222
- Aphrectomy**
- Percutaneous atherectomy with the Kensey catheter: Early and midterm results in femoropopliteal occlusions unsuitable for conventional angioplasty.** Desbrosses et al. (France) 1990; 4:550-552
- Atheroembolism**
- The role of extraanatomic exclusion bypass in the treatment of disseminated atheroembolism syndrome.** Kaufman et al. (USA) 1990; 4:260-263
- Atherogenesis**
- The effects of heparin upon atherogenesis in the Watanabe heritable hyperlipidemic rabbit.** Workman et al. (USA) 1990; 4:344-350
- Atherosclerosis**
- The effects of laser energy on the arterial wall.** Faught and Lawrence. (USA) 1990; 4:198-207

- Accuracy of B-mode ultrasonography in detecting carotid plaque hemorrhage and ulceration. Barry et al. (S. Africa) 1990; 4:466-470
- Aortic reimplantation of the superior mesenteric artery for atherosclerotic lesions of the visceral arteries: Sixty cases. Kieny et al. (France) 1990; 4:122-125
- Calcified obstructive disease of the aortic isthmus. Coffin et al. (France) 1990; 4:147-150
- Histologic and morphologic effects of rotary atherectomy on human cadaver arteries. Ahn et al. (USA) 1990; 4:563-569
- Neurologic complications of axillary and brachial catheter arteriography in atherosclerotic patients: Predictive factors. Gagliardi et al. (France) 1990; 4:546-549
- Routine exercise testing to detect coronary artery disease in patients with atherosclerotic vascular disease. Van der Watt et al. (S. Africa) 1990; 4:479-484
- Strategies in the treatment of major tissue loss and gangrene: Results of 100 consecutive vascular reconstructions. Reichman et al. (USA) 1990; 4:233-237
- Athletic injury**
- Traumatic pseudoaneurysm in a wrestler. Annenberg et al. (USA) 1990; 4:69-71
- Autogenous tissue**
- Autogenous tissue reconstruction in the management of aortoiliofemoral graft infection. Quiñones-Baldrich et al. (USA) 1990; 4:223-228
- Axillofemoral bypass**
- The role of extranatomic exclusion bypass in the treatment of disseminated atheroembolism syndrome. Kaufman et al. (USA) 1990; 4:260-263
- B**
- B-mode ultrasonography**
- Accuracy of B-mode ultrasonography in detecting carotid plaque hemorrhage and ulceration. Barry et al. (S. Africa) 1990; 4:466-470
- Basal cerebral arteries**
- Significance of transcranial Doppler CO₂ reactivity measurements for the diagnosis of hemodynamically relevant carotid obstructions. Reith et al. (W. Germany) 1990; 4:359-364
- Bifurcation graft. see Graft**

- Safe extracranial vascular evaluation and surgery without preoperative arteriography. Hill et al. (USA) 1990; 4:34-38

E**Ehlers-Danlos syndrome**

Multiple aneurysms in a seven-year-old child. Bordeau et al. (France) 1990; 4:26-28
Type IV Ehlers-Danlos syndrome with isolated arterial involvement. Bellenot et al. (France) 1990; 4:15-19

Elastase

The calcium messenger system and the kinetics of elastase release from human neutrophils in patients with abdominal aortic aneurysms. Cohen et al. (USA) 1990; 4:570-574

Elderly patients

Amputation in elderly and high-risk vascular patients. Greant and VandenBrande. (Belgium) 1990; 4: 288-290

Carotid artery endarterectomy in patients over seventy years-of-age. Schröe et al. (Belgium) 1990; 4: 133-137

Electroencephalographic monitoring

Intraoperative electroencephalographic monitoring during carotid surgery with routine shunting. Scheyvaerts and Limet. (Belgium) 1990; 4:318-322

Embolism

Prophylactic placement of vena caval filters: A cautionary note. Greene et al. (USA) 1990; 4:229-232

Traumatically-induced embolus to the hand from a thrombosed PTFE vascular access graft. Senofsky et al. (USA) 1990; 4:182-184

Embolization, therapeutic

Arterioportal fistulas: Twelve cases. Pietri et al. (France) 1990; 4:533-539

Endovascular occlusive intervention in the management of trauma. Klein et al. (USA) 1990; 4:424-430

Pelvic arteriovenous fistulas: Therapeutic strategy in five cases. Laurian et al. (France) 1990; 4:1-9

Traumatic superior mesenteric artery—portal vein fistula. Deitrick et al. (USA) 1990; 4:72-76

Endothelial seeding

Polyurethane arterial prosthesis: Experimental evaluation. Martin-Mondiere et al. (France) 1990; 4:52-57

Endovascular occlusion. see Embolization, therapeutic**Ergotism**

St. Anthony's fire: Successful reversal of ergotamine-induced peripheral vasospasm by hydrostatic dilatation. Baader et al. (USA) 1990; 4:597-599

Exercise testing

Routine exercise testing to detect coronary artery disease in patients with atherosclerotic vascular disease. Van der Watt et al. (S. Africa) 1990; 4: 479-484

Experimental studies

The effects of heparin upon atherogenesis in the Watanabe heritable hyperlipidemic rabbit. Workman et al. (USA) 1990; 4:344-350

The evolution of a clinically relevant experimental model for the realistic evaluation of long-length (80-cm) arterial prostheses. Wu et al. (USA) 1990; 4:58-64

Antibiotic prophylaxis of late bacteremic vascular graft infection in a dog model. Goëau-Brissonnière et al. (France) 1990; 4:528-532

Experimental evaluation of polymerized Dacron grafts in the iliac position of pigs. Norgren et al. (Sweden) 1990; 4:575-579

Implant site: A determinant of completeness of arterial prosthesis healing in the dog and possibly humans. Durante et al. (USA) 1990; 4:171-178

Polyurethane arterial prosthesis: Experimental evaluation. Martin-Mondiere et al. (France) 1990; 4:52-57

Extraanatomic bypass

Autogenous tissue reconstruction in the management of aortoiliofemoral graft infection. Quiñones-Baldrich et al. (USA) 1990; 4:223-228

Extrinsic compression

Extrinsic compression of the renal artery by diaphragmatic crus. Clément et al. (France) 1990; 4:305-308

F**Femoral artery**

Antibiotic therapy for arterial infection: Lessons from the successful treatment of a mycotic femoral artery aneurysm without surgical reconstruction. Kaufman et al. (USA) 1990; 4:592-596

Autogenous tissue reconstruction in the management of aortoiliofemoral graft infection. Quiñones-Baldrich et al. (USA) 1990; 4:223-228

Bilateral congenital aplasia of the deep femoral arteries. Schmidt et al. (W. Germany) 1990; 4:498-501

Femoral vein

The use of internal jugular vein as interposition graft for femoral vein reconstruction following traumatic venous injury: A useful approach in selected cases. Woodson et al. (USA) 1990; 4:494-497

Femoropopliteal bypass

Basic data related to infrainguinal revascularization procedures. Dalman and Taylor. (USA) 1990; 4: 309-312

Preferential use of ePTFE for above-knee femoropopliteal bypass grafts. Patterson et al. (USA) 1990; 4:338-343

Strategies in the treatment of major tissue loss and gangrene: Results of 100 consecutive vascular reconstructions. Reichman et al. (USA) 1990; 4: 233-237

Successful percutaneous angioplasty after failed femorodistal bypass. Harris et al. (USA) 1990; 4:431-436

Femoropopliteal occlusion

Percutaneous atherectomy with the Kensey catheter: Early and midterm results in femoropopliteal occlusions unsuitable for conventional angioplasty. Desbrosses et al. (France) 1990; 4:550-552

Femorotibial bypass

Strategies in the treatment of major tissue loss and gangrene: Results of 100 consecutive vascular reconstructions. Reichman et al. (USA) 1990; 4: 233-237

Fibromuscular dysplasia

Rupture of a superior mesenteric artery aneurysm in a child. Detroux et al. (Belgium) 1990; 4:506-509

Fibronectin

Polyurethane arterial prosthesis: Experimental evaluation. Martin-Mondiere et al. (France) 1990; 4:52-57

Fistula

A paraprosthetic-enteric fistula associated with a duodenal tumor. Dachs et al. (USA) 1990; 4:65-68

- Aortocaval fistula and contained rupture of an abdominal aortic aneurysm presenting with pelvic venous congestion.** Saxon et al. (USA) 1990; 4:381-383
- Arterioportal fistulas:** Twelve cases. Pietri et al. (France) 1990; 4:533-539

I**Iliac artery**

Autogenous tissue reconstruction in the management of aortoiliofemoral graft infection. Quiñones-Baldrich et al. (USA) 1990; 4:223-228

Congenital anomalies of the external iliac artery: Case report and review of the literature. Tamisier et al. (France) 1990; 4:510-514

Isolated iliac artery aneurysms. Weimann et al. (Austria) 1990; 4:297-301

Pelvic arteriovenous fistulas: Therapeutic strategy in five cases. Laurian et al. (France) 1990; 4:1-9

Iliac vein

A new technique for bilateral iliac vein and inferior vena cava reconstruction using reinforced polytetrafluoroethylene. Murchan et al. (Ireland) 1990; 4:302-304

Infection. see also Nosocomial infection

The effect of femoral arteriography on the incidence of groin contamination and postoperative infections. Ameli et al. (Canada) 1990; 4:328-332

The surgical implications of purpura fulminans. Cohen et al. (USA) 1990; 4:276-279

Antibiotic therapy for arterial infection: Lessons from the successful treatment of a mycotic femoral artery aneurysm without surgical reconstruction. Kaufman et al. (USA) 1990; 4:592-596

Nosocomial infection surveillance in a vascular surgery unit. Verdeil et al. (France) 1990; 4:553-557

Infrainguinal arteries

Basic data related to infrainguinal revascularization procedures. Dalman and Taylor. (USA) 1990; 4: 309-312

Improved strategies for secondary operations on infrainguinal arteries. Veith et al. (USA) 1990; 4:85-93

Strategies in the treatment of major tissue loss and gangrene: Results of 100 consecutive vascular reconstructions. Reichman et al. (USA) 1990; 4: 233-237

Infrapopliteal graft

Basic data related to infrainguinal revascularization procedures. Dalman and Taylor. (USA) 1990; 4: 309-312

Internal carotid artery

Closure of the internal carotid artery after endarterectomy: The advantages of patch angioplasty without its disadvantages. Vanmaele et al. (Belgium) 1990; 4:81-84

Free-floating thrombus of the extracranial internal carotid artery. Combe et al. (France) 1990; 4:558-562

Long-term results after carotid endarterectomy for carotid artery stenosis with contralateral occlusion. Vermassen et al. (Belgium) 1990; 4:323-327

Intestinal injuries

Seat belt aorta. Randhawa and Menzoian. (USA) 1990; 4:370-377

Intestinal ischemia

Acute visceral ischemia secondary to aortic graft occlusion. Ward and Joyce. (United Kingdom) 1990; 4:502-505

Aortic reimplantation of the superior mesenteric artery for atherosclerotic lesions of the visceral arteries: Sixty cases. Kieny et al. (France) 1990; 4:122-125

Arterioportal fistulas: Twelve cases. Pietri et al. (France) 1990; 4:533-539

Mesenteric infarction in Takayasu's disease. Nusseame et al. (France) 1990; 4:117-121

Recent trends in the diagnosis and management of chronic intestinal ischemia. Hallett et al. (USA) 1990; 4:126-132

Superior mesenteric artery embolism: Eighty-two cases. Batellier and Kieny. (France) 1990; 4:112-116

Ischemia. see also Cerebral ischemia; Intestinal ischemia

Bilateral congenital aplasia of the deep femoral arteries. Schmidt et al. (W. Germany) 1990; 4:498-501

Carotid artery endarterectomy in patients over seventy years-of-age. Schröe et al. (Belgium) 1990; 4: 133-137

Free vascularized tissue transfer for limb salvage in peripheral vascular disease. Greenwald et al. (USA) 1990; 4:244-254

Preoperative evaluation of cardiac risk using dobutamine-thallium imaging in vascular surgery. Zellner et al. (USA) 1990; 4:238-243

St. Anthony's fire: Successful reversal of ergotamine-induced peripheral vasospasm by hydrostatic dilatation. Baader et al. (USA) 1990; 4:597-599

J**Jugular vein**

The use of internal jugular vein as interposition graft for femoral vein reconstruction following traumatic venous injury: A useful approach in selected cases. Woodson et al. (USA) 1990; 4:494-497

K**Kawasaki's disease**

Multiple aneurysms in a seven-year-old child. Bordeau et al. (France) 1990; 4:26-28

Kensey catheter

Percutaneous atherectomy with the Kensey catheter: Early and midterm results in femoropopliteal occlusions unsuitable for conventional angioplasty. Desbrosses et al. (France) 1990; 4:550-552

L**Laser angioplasty**

The effects of laser energy on the arterial wall. Faught and Lawrence. (USA) 1990; 4:198-207

Basic data related to laser angioplasty. Seeger. (USA) 1990; 4:515-518

Laser therapy

The use of infrared therapy in the treatment of venous ulceration. Sugrue et al. (Ireland) 1990; 4:179-181

Laser-arterial wall interactions

The effects of laser energy on the arterial wall. Faught and Lawrence. (USA) 1990; 4:198-207

Leiomyosarcoma

Popliteal artery leiomyosarcoma: A case report and review of the literature. Briggs et al. (England) 1990; 4:365-369

Leriche, René

René Leriche and his work as time goes by. Kieny. (France) 1990; 4:105-111

Limb salvage

The evolution of a clinically relevant experimental model for the realistic evaluation of long-length (80-cm) arterial prostheses. Wu et al. (USA) 1990; 4:58-64

Free vascularized tissue transfer for limb salvage in peripheral vascular disease. Greenwald et al. (USA) 1990; 4:244-254

Improved strategies for secondary operations on infringuinal arteries. Veith et al. (USA) 1990; 4:85-93

Strategies in the treatment of major tissue loss and gangrene: Results of 100 consecutive vascular reconstructions. Reichman et al. (USA) 1990; 4: 233-237

Lipid metabolism abnormalities

Basic data related to lipid abnormalities in peripheral vascular disease. Rapp. (USA) 1990; 4:604-608

Lower extremity arterial disease. see also Peripheral vascular disease

Amputation in elderly and high-risk vascular patients. Greant and VandenBrande. (Belgium) 1990; 4: 288-290

Can duplex scanning replace arteriography for lower extremity arterial disease? Kohler et al. (USA) 1990; 4:280-287

Free vascularized tissue transfer for limb salvage in peripheral vascular disease. Greenwald et al. (USA) 1990; 4:244-254

Primary closure of below-knee amputation stumps: A prospective study of sixty-two cases. Aline et al. (France) 1990; 4:143-146

Transluminal angioplasty performed by the surgeon in lower limb arterial occlusive disease: One hundred fifty cases. Clément et al. (France) 1990; 4:519-527

Lumbar injuries

Seat belt aorta. Randhawa and Menzoian. (USA) 1990; 4:370-377

Lumbar vertebrae erosion

A chronic contained rupture of an abdominal aortic aneurysm complicated with severe back pain. Nakagawa et al. (Japan) 1990; 4:189-192

Lymphedema

An easy method for diagnosis of lymphedema. Richards et al. (USA) 1990; 4:255-259

Lymphoscintigraphy

An easy method for diagnosis of lymphedema. Richards et al. (USA) 1990; 4:255-259

M

Mesenteric artery

Arterioportal fistulas: Twelve cases. Pietri et al. (France) 1990; 4:533-539

Mesenteric infarction

Mesenteric infarction in Takayasu's disease. Nusasme et al. (France) 1990; 4:117-121

Superior mesenteric artery embolism: Eighty-two cases. Batellier and Kieny. (France) 1990; 4:112-116

Mortality and morbidity

Amputation in elderly and high-risk vascular patients. Greant and VandenBrande. (Belgium) 1990; 4: 288-290

Combined mortality and morbidity of direct surgical treatment of abdominal aortic aneurysm. Brancheau et al. (France) 1990; 4:10-14

Mycotic aneurysm

Antibiotic therapy for arterial infection: Lessons from the successful treatment of a mycotic femoral artery aneurysm without surgical reconstruction. Kaufman et al. (USA) 1990; 4:592-596

N

Neurologic complications

Neurologic complications of axillary and brachial catheter arteriography in atherosclerotic patients: Predictive factors. Gagliardi et al. (France) 1990; 4: 546-549

GUIDELINES FOR AUTHORS

The ANNALS OF VASCULAR SURGERY, a quarterly journal, invites for review original manuscripts reporting clinical and experimental work in the field of vascular surgery. Papers may be directed to the following specific sections of the journal:

—Original Articles (Reports of clinical series, new investigations, experimental work, new drug or medical device trials);

—General Reviews (Scholarly and complete review of the existing literature on a subject of broad general interest in vascular surgery);

—Surgical Notes (Small items of interest, e.g., observations on a new type of suture or hemostat);

—Selected Techniques in vascular surgery (Technical maneuvers, i.e., "How I do it");

—Editorials;

—Historical Notes (Interesting vignettes from the earlier days of vascular surgery);

—How it happened: the inside story of vascular surgery (First person accounts of breakthroughs and achievements in vascular surgery).

These manuscripts will be considered with the understanding that they have not been submitted for publication elsewhere. The editors welcome correspondence; signed letters are reviewed according to the same standards as other articles.

Manuscripts and other communications written in French should be addressed as follows:

Send to Edouard KIEFFER, MD, Editor, Annals of Vascular Surgery, Service de Chirurgie Vasculaire, Groupe Hospitalier Pitie-Salpêtrière, 83, boulevard de l'Hôpital, 75651 PARIS, cedex 13 FRANCE.

Manuscripts written in English should be sent to the following offices:

• North America, Latin America, Australia and Japan:

Send to Ramon BERGUER, MD, Ph.D., Editor, Annals of Vascular Surgery, Harper Hospital, 3990 John R, Detroit, MI 48201.

• Europe, United Kingdom, Scandinavia

Send to David CHARLESWORTH, DSc, Department of Surgery, University Hospital of South Manchester, West Didsbury, Manchester, United Kingdom M208LR.

Manuscripts written in Spanish should be addressed as follows:

J.M. CAPDEVILA, MD, Editor, Servicio de Cirugía, Vascular Hospital de Bellvitge, "Príncipes de España," Barcelona, SPAIN.

Authors should use the manuscript checklist and manuscript preparation guidelines outlined below when preparing papers for *Annals of Vascular Surgery*.

Manuscript Checklist

—Three complete sets of manuscripts typed on 8½" x 11" (22 x 28 cm) white bond paper, on one side of the paper, double-spaced, with 1¼" (2.5 cm) margins all around (carbon copies not acceptable). Number pages consecutively in the upper right-hand corner, starting with the title page.

—Title page, including name and highest achieved degree(s) of each author, institution from which work originated, sources of financial support, and the complete address of the author who is responsible for correspondence, galley proofs, and reprint requests. If paper was presented at a scientific meeting, provide a footnote giving name of meeting, date, and location.

—Abstract/Synopsis, 150–200 words in length, concisely summarizing the methods,

results, and conclusions reported in your paper.

—Body of paper, organized in the following manner: Introduction, Materials and Methods, Results, Discussion, and Conclusions (Note organization may vary according to category of manuscript). Subheads added within lengthy sections to no more than three levels.

—Acknowledgments of persons who have contributed to the scientific development or production of the manuscript.

—References, typed double-spaced, in the order in which they appear in the text (sequential order) according to the Vancouver Style.

—Tables, typed double-spaced on separate pages, numbered in Arabic, in the order in which they appear in the text and given a brief descriptive title. Information arranged in columns, with abbreviations, acronyms, or unusual units of measurement explained in table footnotes.

—Legends to illustrations, typed double-spaced in a list in numerical order, on a separate page.

—Illustrations, including 4 sets of high contrast black and white glossy prints, 5" x 7" (12.5 cm x 17.75 cm) packaged in a separate envelope, with Figure number and author's name clearly indicated on the back of the prints. Only professionally drawn and photographed illustrations will be considered.

—Cover letter from the senior author, stating section of journal manuscript is written for, and including full mailing address and telephone number of corresponding and senior authors.

—Copyright transfer form with signatures of all authors on paper affixed.

—Permissions to reproduce previously published material authorized by publisher or individuals holding copyright to material in question.

Style and content of manuscripts

The editors request that authors keep their manuscripts succinct and to the point, omitting material that is well-known and which has been published already. Article introductions may contain interesting and relevant historical background, but such material should be inserted judiciously. Discussions should focus on the work at hand, including only those references that directly relate to the subject of the article. We strongly encourage use of active voice verbs to give vigor to sentence structure and to keep the reader's focus on the actions of the investigator.

Abbreviations should be kept to a minimum and must be completely spelled out the first time they are used in the paper. Standard international units (SI units) should be used whenever appropriate.

Notes on preparation of manuscripts

Text

Manuscripts must conform to standard French/English/Spanish usage and are subject to editorial changes according to the policies of the journal. Generic names of drugs should be used whenever possible. State all measurements in metric units.

In general, the text should be organized in the following manner: introduction, materials and methods, results and discussion. Provide brief internal headings to clarify paper's organization. Cite tables and illustrations in text by number in text.

For guidance in text preparation, authors may consult the following works:

—American Medical Association: Manual

for Authors and Editors. Los Altos, CA: Lange Medical Publications, 1981.

—Council of Biology Editors Style Manual, 5th edition. Council of Biology Editors, 9650 Rockville Pike, Bethesda, MD 20814.

—The Chicago Manual of Style, Thirteenth Edition. Chicago: University of Chicago Press, 1982.

References

Cite references when necessary within the text. Any reference cited in the text must appear on the Reference Page. Number references in brackets in the sequence in which they appear in the manuscript. Personal communications and unpublished data are not references and should not appear in the reference list. (They may be mentioned either in footnotes or parenthetically in the body of the text).

Annals of Vascular Surgery follows the Vancouver Style for references with one modification: instead of reporting names of all authors, please cite just the first three authors followed by *et al.* A detailed outline of the Vancouver Style may be obtained from the *Annals of Internal Medicine*, 4200 Pine St, Philadelphia, PA 19104. Sample entries appear below:

—Journal article: LA CERTE RA, LA RUE R, MONET E et al. Vertebral artery disease. *Vasc Surg*, 1986; 14: 195–198.

—Book: RENOIR A. *Vascular Surgery*. New York, Whitehouse, 1985, 45–49.

—Chapter in book: LA CERTE RA. Renovascular hypertension. In: RENOIR A. ed. *Vascular Surgery*. New York, Whitehouse, 1985, 129–140.

Illustrations

Illustrations must be of good quality, suitable for reproduction, and for reduction as necessary to page size. Limit illustrations to those that amplify, not duplicate the text. Submit original artwork or unmounted glossy prints. If an illustration has several components, submit each separately, unmounted, and indicate how picture should be composed. Prints should measure approximately 5" x 7" (13 x 18 cm). All lettering or other markings on illustrations must be done by a professional medical illustrator. Typewritten or freehand markings are unacceptable. On the back of each illustration, record its number, the first author's name, and the direction of the top of the illustration in China marker or crayon or on separately typed adhesive labels. Protect illustrations from damage by placing them in a separate envelope with a piece of cardboard to keep them flat. Do not paper clip illustrations to your manuscript. Color illustrations may be submitted, but authors will have to bear the expense of color reproduction.

Legends should be typed on a separate page at the end of the manuscript following the references and tables.

Data Analysis

Appropriate statistical methodology should be used in those studies where it is applicable. Engage the assistance of a biostatistician in the preparation of your data if you are not familiar with statistical methodology yourself.

Permissions

Lengthy direct quotations (three or more paragraphs long), illustrations, or tables that have appeared in previously published material must be accompanied by written permission for their use from the copyright holder (normally the publisher of the material).

Reprints

Reprint order forms will be included with galley proofs. Authors must order their reprints at the same time they correct galley proof.
